Fresh graduate in Informatics from Telkom University with hands-on experience in software development through internships and organizational activities. Proficient in Frontend Development, JavaScript, ReactJS, API Integration, and modern web development technologies. Experienced in developing responsive and user-friendly applications, collaborating with teams, and adapting to new technologies and development environments. Holds a Bachelor's degree in Informatics and is continuously expanding knowledge and skills in Data Science. Highly motivated to contribute technical skills and problem-solving abilities to software development projects in a collaborative and dynamic environment.

Education

Telkom University

Bandung, Jawa Barat

Fresh Graduate - Bachelor of Informatics (GPA 3.50/4.00)

Sept 2024 - Aug 2026

- Continuing education from Diploma to Bachelor's degree through an extension program.
- Focus on advanced topics in software engineering, data science, and system architecture.
- Bachelor Thesis : "Utilization of Generative AI for Process Discovery in Operational Maintenance Data Electric Power Company"

Telkom University

Bandung, Jawa Barat

Graduate - Diploma in Software Application Engineering (GPA 3.67/4.00)

Sept 2021 - Aug 2024

- Diploma Thesis : "MedRecordX : PATIENT MEDICAL RECORD APPLICATION (CASE STUDY : TELAGASARI AZIMAT CLINIC)"

Experience

Perum Peruri

Jakarta Selatan, DKI Jakarta

Programmer Internship

Mar 2026 - Juni 2026

- Developing an Astro and Vue.js-based SSO frontend with a hybrid architecture (SSR + SPA) for optimal performance and modularity.
- Implementing complex authentication API integrations using OAuth 2.0 and OpenID Connect, including token exchange, refresh tokens, and session management.
- Building access protection and error handling systems (expired tokens, unauthorized access) as well as reusable UI components to support the application's scalability and maintainability.

Cohort React & Backend

Remote

Asah led by Dicoding

Programmer Apprenticeship

Aug 2025 - Jan 2026

- Led the React frontend and backend integration for a predictive lead scoring web application to support banking sales optimization.
- Developed high-fidelity dashboards (sales & admin) using React with a slicing design-to-code approach for accurate UI implementation.
- Architected the backend using Supabase, managing cloud database design, authentication, authorization, and ML model integration for predictive scoring.
- Coordinated development in an Agile environment, aligning UI, ERD, and system features while delivering scalable filtering and technical documentation.

Direktorat Pusat Teknologi Informasi (PuTI)

Bandung, Jawa Barat

Telkom University

Programmer Internship

Feb 2024 - Aug 2024

- Completed an internship at the Directorate of PuTI (Basila – Academic Standards and Services) at Telkom University as a Frontend Programmer.
- Contributed as a Frontend Developer to the development of Telkom University's internal academic information system.
- Developed user interfaces for the T-Feeder application using AngularJS to support reliable and efficient data interaction.
- Supported the integration of Neo Feeder PDDIKTI with the university's academic system by collaborating with backend teams and implementing API-based data synchronization.

Organizational

Chevalier Lab

Bandung, Jawa Barat

Cohort Web Developer

Jan 2023 - June 2023

- Engaged in a technical study group on Laravel to deepen understanding of modern web application development.
- Explored system architecture, backend logic, and database management using Laravel through case studies and implementation sessions.

Himpunan Mahasiswa Rekayasa Perangkat Lunak Aplikasi

Bandung, Jawa Barat

Advocacy department staff

Sep 2022 - Jan 2023

- The related work program advocates for all D3 Application Software Engineering students by providing services, advocacy and as a place for complaints.

Certificates
